Medical Face Masks

Stay safe with McAirLaid's  
**MEDICAL FACE MASKS**

Made in Germany

McAirLaid's

## Protect yourself and others

Shortly after the start of the COVID-19 pandemic, many countries increased hygiene and safety standards in all public areas. Several of the standards include wearing a face mask to cover nose and mouth in public areas like public transportation, schools, grocery stores and shopping centers.

## Different types of Face Masks

The German Federal Institute for Drugs & Medicinal Products distinguishes the following mask types:

### 1. Community- Mask

**Synonyms:** DIY Mask  
**Use:** private use only  
**Medical product:** no  
**Certification:** no

### 2. Medical Face Mask

**Synonyms:** surgical- / operation masks  
**Use:** protecting others  
**Medical product:** yes  
**Certification:** CE certified  
Norm DIN EN 14683:19

## Medical Face Masks

These surgical masks are mainly used for protection against foreign bodies and prevent droplets from the air being breathed, for example, from entering a patient's open wounds.

**Type IIR** masks have a splash protection effect due to the outer layer and therefore offer limited protection.

**Medical face masks** are marketed as medical devices and they are subject to medical device law. After a successful verification procedure, manufacturers can label them with the CE mark and then they are freely marketable in Europe.

## BONDOO Medical Face Mask

- CE certified (**Type IIR EN 14683:19**)  
Tested by Hohenstein Institute
- Bacterial filtration >98%
- Splash resistance >16 kPa (pressure)
- 3-layer (meltblown as filter material)
- Low breathing resistance

Typ IIR

Made in Germany

Contents of pack: 50 pieces/ 30 pieces,  
standard size

## Application

Wash hands thoroughly, using soap, before and after wearing face mask.

Cover mouth and nose and pull the retaining bands over your ears.

Press the nose pad down so that the mask fits well.

Pull the mask down as far as your chin, and adjust it until your mouth and nose are fully covered.

Please wear each mask only once and then dispose of it with waste.

## We can do it!

Do you have a specific product wish or ingenious product idea? Then you are at the right place with McAirLaid's. Our flexible production process permits your vision to be realized at the product level.

With unique technology and a smart combination of individual raw material components, we create products which confidently fulfill the individual requirements of our customers and end users.
